## Education

|                                                                                                                              |                  |
|------------------------------------------------------------------------------------------------------------------------------|------------------|
| <b>Bachelor of Technology in Computer Science and Engineering</b><br>NMAM Institute of Technology (NMAMIT), Nitte, Karnataka | <b>2024–2028</b> |
| <b>Senior Secondary (XII), Loyola School, Jamshedpur (ISC)</b><br>Percentage: <b>90.25%</b>                                  | <b>2024</b>      |
| <b>Secondary (X), Loyola School, Jamshedpur (ICSE)</b><br>Percentage: <b>93.2%</b>                                           | <b>2022</b>      |

## Technical Skills

- **Languages:** C, C++, Java, Python, SQL, JavaScript, R
- **Web Technologies:** HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Core Subjects:** DSA, OOP, DBMS, Operating Systems, COA, Software Engineering, Microprocessors & Microcontrollers
- **Tools & Platforms:** Git, GitHub, Docker, Postman, VS Code, Eclipse, Android Studio, Vercel, Render, Netlify
- **Concepts:** Machine Learning, REST APIs, Monte Carlo Simulation, Explainable AI (XAI), Data Visualization

## Projects

|                                                                                                                                                                                                                                                                                                                                                                         |             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>StartUp Forge</b><br>• Built using React, TypeScript, Tailwind CSS, Framer Motion, and Gemini AI for startup planning.<br>• Integrated Gemini AI to generate personalized startup roadmaps, product strategies, and execution plans.<br>• Designed responsive interfaces with reusable components, theme switching, and optimized client-side routing.               | <b>Live</b> |
| <b>FIFA World Cup 2026 AI Forecaster</b><br>• Trained ensemble ML models on 49K+ international matches and FIFA World Cup data (1930–2022).<br>• Combined ELO, Dixon-Coles, XGBoost, and 100K Monte Carlo simulations for tournament forecasting.<br>• Built a production-ready Next.js + FastAPI platform with XAI, Golden Boot prediction, and 240+ player analytics. | <b>Live</b> |
| <b>PitchIQ Analytics</b><br>• Built a cricket analytics platform using React, Node.js, Express, Python, and 11.1M+ ball-by-ball records.<br>• Developed AI-powered player analytics, head-to-head matchup prediction, and tactical planning.<br>• Implemented Monte Carlo simulations, REST APIs, interactive dashboards, and real-time data visualization.             | <b>Live</b> |
| <b>HackOps HealthHub</b><br>• Developed for ACEathon 2025 using React, TypeScript, Tailwind CSS, and React Three Fiber.<br>• Implemented rule-based symptom analysis, BMI calculator, medicine reminders, and interactive 3D pain mapping.<br>• Designed responsive healthcare dashboards with local storage, accessibility-first design, and Framer Motion animations. | <b>Live</b> |

## Certifications

- **Software Engineer** - HackerRank (2026) | Validated software engineering and problem-solving skills.
- **Frontend Developer (React)** - HackerRank (2026) | Demonstrated React.js and frontend development expertise.
- **Microsoft Certified: Azure AI Fundamentals** - Microsoft (2025) | Fundamentals of AI, ML, and Azure AI services.
- **SQL (Intermediate)** - HackerRank (2026) | Advanced SQL queries, joins, and database concepts.
- **Cloud Security Essentials** - AWS (2025) | Cloud security, IAM, and AWS best practices.
- **Core Java & Object-Oriented Programming** - Infosys (2025) | Java programming and OOP principles.

## Hackathons & Achievements

- **Finalist** - HackLoop Season 4 | Developed a Web3 real estate tokenization platform for fractional property trading.
- **Finalist** - Innovate for India, ICFAI Business School Pune | Reached the final round by developing an innovative solution.
- **Finalist** - Debug Ur Soul 2.0 | Finalist in an intra-college DSA and aptitude competition.
- **Participant** - Adobe India Hackathon 2025 | National software development hackathon.
- **LeetCode** - Solved 100+ DSA problems.
